NURSERIES COMPANY**

70 Years in Business

GLEN SAINT MARY • FLORIDA

Telephone: Glen Saint Mary No. 186-W

AZALEA, George Lindley Taber

This glorious Azalea, a Glen Saint Mary introduction named for our founder, is the loveliest of all the variegated sorts. The plant is well shaped and a strong grower. It stands the cold unusually well and is equally happy in either sun or shade. Often called the "Orchid Azalea," the fragrant flowers are among the largest of the Indicas, and are particularly beautiful when combined with the darker lavenders. See page 6.

Fellow Tradesmen...

We can't complain about the weather this time. Indeed, we find it hard to kick about any aspect of the season just behind us, except perhaps that it was too short. That, of course, is not a new condition but it is one that now has some possibility of solution. The answer is simple, and we should have realized it sooner . . . CANS!

Every effort is being made to hasten our production of container-grown nursery stock, and we are now installing the most modern sprinkler system available on a little over an acre of ground, with distinct likelihood that this will be considerably enlarged in the near future.

In the interim, our supply of tried and true bare-root and B&B stock seems more adequate than usual. For instance, Persimmons! We have them by the acre, bushel, foot or thousand. It is our emphatic opinion that multitudes of people are missing a taste thrill because they have never been introduced to Persimmons.

The citrus situation is rapidly improving after the fiasco of two winters ago. Some larger sizes are again in evidence and the decorative varieties particularly are in better supply.

They say repetition lends emphasis, and we really must get across, for your sake and ours, the fact that we get pretty busy during our rush season in the winter. We beg that you give us as much advance notice as possible before coming or sending for a load. We usually have to schedule our deliveries weeks in advance in order to make things come out right.

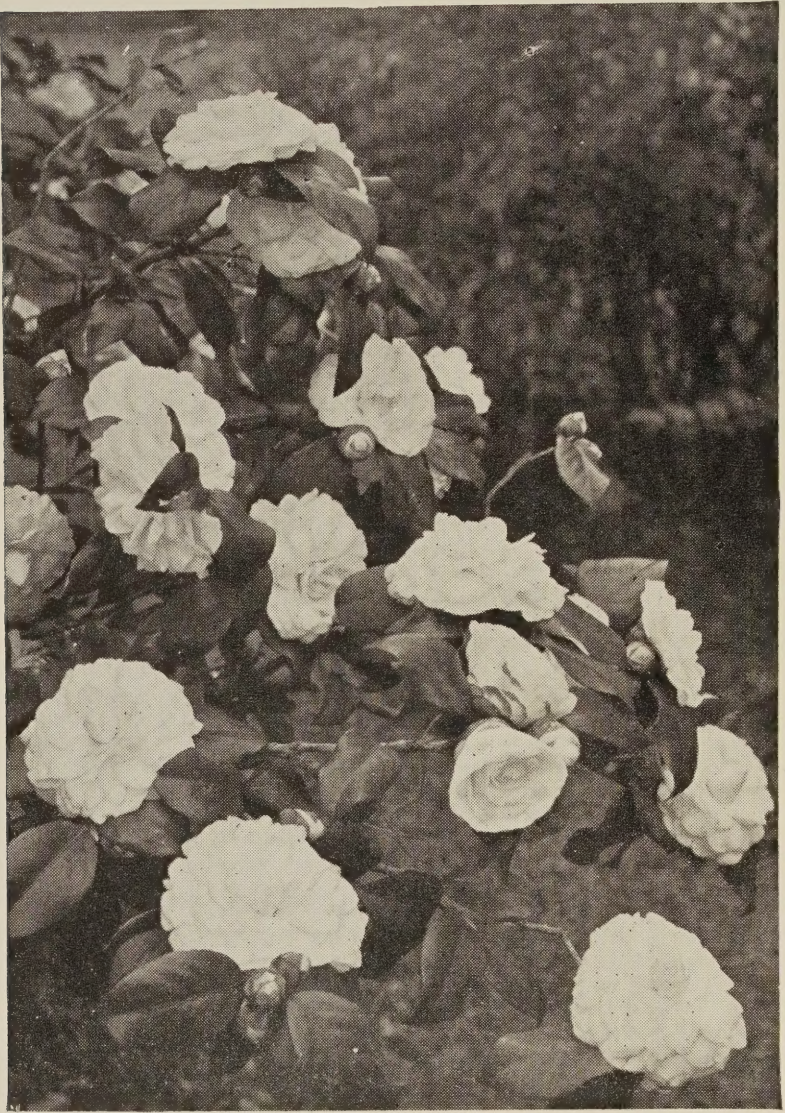

Don't forget the American Association of Nurserymen. Our Florida Chapter is growing fast, and the bigger it becomes, the better job it can do for its members. We have application blanks here and will be glad to supply information regarding the organization on request. You'll find membership makes a difference!

And now once again, our best thanks to all of you who had a part in our highly successful year of 1951-52. We deeply appreciate your patronage and will look forward to opportunities of steadily increasing it this fall and winter.

Glen Saint Mary Nurseries Company

George L. Taber, Jr., *President*

CAMELLIA, Alba Plena

CAMELLIA JAPONICA

Down through the years the Camellia has become almost synonymous with the Southland. This popularity is deserved, both for its ability to enhance any landscape and for the charming distinction of the blooms on all occasions to which they are appropriate.

Blooming season at Glen Saint Mary is October through February. We extend a cordial invitation to all of you who can to see them in flower and make your selections personally.

GS. refers to French importations from Guichard Sisters, Nantes, France.

To avoid confusion, the letters A through H are used following each variety as a guide to sizes available in that particular Camellia.

Rare Varieties

Adolphe Audusson. (GS.) A very large, semi-double flower of deep red with distinctly darker veins. The long yellow stamens are in a cluster in the center and occasionally there are a few petaloids. The dark green leaves are thick, with serrated margins. B, C, D.

Comtesse Canarii. Imbricated salmon. D, E, F, G.

Darsi (GS.) A semi-double flower with large petals of rich red with a distinct white splotch on two petals. Very long stamens. A strikingly handsome flower, blooming in January. D.

Please read "Conditions of Sale" on page 49 before you order.

CAMELLIAS, RARE VARIETIES, continued

- Debutante.** Peony type, soft pink. Hardy. Early. A, B, C, D, E.
- Enrico Bettoni.** Very large, full, peony-form flowers of clear satiny pink. The petals in the center are erect and sometimes folded back, while the outer petals are fluted and deeply notched. Stamens are interspersed, even to the outside rows of petals. C, D, E, F, G, H.
- General Lamoriciere.** (GS.) Large, semi-double flower of palest pink, striped with deeper pink; yellow stamens interspersed. A, B.
- Gigantea.** (GS.) Large, peony form, deep red, splotched white. Spreading plant with enormous leaves. A, B, C, D, E.
- Governor Mouton.** Named for the first Democratic governor of Louisiana, this large, peony-type flower is a pure deep red blotched with white. A strikingly beautiful variety. D, E, F, G, H.
- Il Tramonto.** (GS.) Full double, soft rose-pink marbled white. G.
- Kellingtonia.** (GS.) Large, peony type, rich pink, lighter in center. B, C, D.
- Lady Clare (Empress).** Large, semi-double, rose-pink flowers of crepe-like texture; prominent stamens. Hardy; vigorous. A, B, C, D, E.
- Lady Mildred.** Large, semi-double flower of carmine-crimson with deeper veining; petals thick and notched, the inner ones creped. Stamens numerous, sometimes with a few small petaloids around them. The filaments are crimson throughout their length, adding greatly to the beauty of the flower. Selected as a seedling at Glen Saint Mary Nurseries. A, B, C.
- Latifolia (Fanny Bolis).** (GS.) Flower medium size, semi-double, variegated carmine with white splotches. Stamens usually centrally clustered. A free bloomer from December through March. Hardy; vigorous and symmetrical. B, C, D, E.
- Magnoliæflora.** This delicately beautiful Camellia is very choice. The semi-double flowers, with 12 to 15 very large petals, are deep rose at the base but pale to soft blush at the tips. The plant is a compact grower with attractive foliage. B, C.
- Marie Morren** (GS.) Medium to large, rose with deeper veins, occasionally flecked with white. D, E.
- Mathotiana.** Very large, full rose form, deep rose-red, outer edges turning purple with age. A, B, C, D, E, F, G.
- Mathotiana Rosea.** (GS.) Very large, rose shape, rose-pink. B, C, D, E, F, G.
- Sergeant Barrios.** Large, semi-double, rosy red. Compact, upright growth. Very desirable. H.
- Valtevarado** (GS.) Full double, cupped, pale pink center petals shading to a deeper rose on the outer petals. Strong grower. C, D.
- Wm. S. Hastie (Col. Firey).** Formal, dark red flowers, true double, rather flat. Hardy. Excellent. A, B, C, D.
- B&B. Branched 10

Standard Varieties

Class A

- Alba Plena.** Full double, very regularly shaped, wax-like pure white. Early. A, B, C, D.
- Anna Bruneau.** This double, deep pink rosebud-form Camellia is a late bloomer, resembling Mathotiana Alba in form. Foliage is large, deep glossy green. Growth upright. B, C.
- Campbelli.** (GS.) Large, full double, red. Late. C.

Order Glen Peat by the yard in truck loads, either in bulk or sacked.

STANDARD CAMELLIAS, CLASS A, continued

Celtic Rosea. Formerly Semi-Double Blush. Propagated from a French import. Semi-double, with petals of the palest blush-pink. Long yellow stamens. Very dainty and beautiful. B, C.

Elegans (Chandler). Very large, incomplete double, cherry-red to rose-pink, splotted with white. A, B, C.

E. L. Steele. Brought to our attention by the late E. L. Steele, a past president of our Company. Pure white, about 3 to 4 inches in diameter. The flowers are high-centered, of incomplete double form, with yellow stamens interspersed. Usually at its best in January and is remarkable for its prolific blooms borne on a strong bush. Foliage of good size, fine dark green. One of the best whites we know and not so temperamental as many others. B, C, D.

Geante des Battailles. Small, peony form, variegated turkey-red with white blotches. The center is a compact mass of petaloids. B, C.

Gloire de Nantes Large, semi-double, very deep rose; long yellow stamens. B, C, D, E, F, G.

Haley's Monarch. A tall, strong-growing, late-blooming variety with rather large foliage. The flower is semi-double and a good shade of light pink. C, D, E.

Herme. Large, peony form, white with red and pink stripes and splottes. A, B, C, D, E, F.

Horkan. A fine variety with semi-double flowers, variable in coloring, but white usually predominates, with pink or rose markings. Interesting and attractive. C, D, E.

Imperator (American). Incomplete double, turkey red, medium size, free flowering, desirable. C, D, E, F.

Pink Perfection. Medium size, shell-pink. Free blooming. A, B, C, D.

Pink Star. Peony form, bright rose-pink, with stamens and petaloids interspersed. Large flowers, somewhat star-shaped. A, B.

Prince Eugene Napoleon. Double, medium size, scarlet. A, B, C, D, E.

Prof. C. S. Sargent. Very double, peony form, varying from clear crimson to light red. B, C, D, E, F, G, H.

Sacco Rose. The blooms are of medium size, complete double, regular imbricated. Color carmine-pink. Leaves dark green, on nicely shaped plant. B, C, D.

Takayama. Flowers tend to be small; self carmine shading lighter toward center. Of regular imbricated form. The blooms are borne profusely and the whole effect is most pleasing. B, C, D, E, F.

AZALEAS

AZALEA INDICA. The Indian Azaleas are evergreen shrubs with large, single or double flowers that sometimes measure 4 inches across. Some are slow-growing, practically dwarf, while others grow rapidly into large shrubs. Colors are varied and very beautiful.

Red and Deep Pink

Brilliant. Early to midseason. Compact, bushy plants with small leaves. Free bloomer, bearing flowers of deep rose-pink.

Prince of Wales. Rather late. Hardy, bushy, compact grower free flowering.

Southern Charm. A sport of Formosa in clear rose-red. The flowers are large and blooming time is about the same as its parent; midseason. Strong grower with good dark green foliage.

Light Pink

Elegans. Early. A fast grower of rather open habit. Free flowering and easy to grow. Flowers of medium size.

Elegans Superba (Pride of Mobile). Midseason. Similar to Elegans but more compact in growth. Flowers are larger and brighter pink.

George Franc. Early. Hardy and bushy. Bears large flowers in profusion.

Macrantha. Very late. Hardy, bushy, compact.

Macrantha, Double Pink. Late. Beautiful clear pink blooms with two or three layers of petals. Good compact grower.

Orange

Macrantha. Very late. Medium-sized flowers. Hardy, bushy growth.

President Clay. Early. Tall, open growth; free flowering. Medium-sized blooms.

Prince of Orange. Midseason. Compact grower; free flowering. The good-sized, deep orange-colored flowers are well mixed through the luxuriant foliage.

Sublanceolata. Late. Tall, open-growing plant with large leaves. Flowers deep orange, very large and extremely showy.

Salmon

Duc de Rohan. Early. Semi-hardy, bushy, very free flowering. Medium-sized flowers.

Frederick the Great. Late. Low, bushy, compact growth; very free flowering. Deep salmon color.

Lawsal. Midseason. Hardy, rather bushy. One of the best.

Azalea Indica Variegated

George Lindley Taber. Our own origination, named for our founder. Soft lavender-pink, faintly streaked darker pink and mottled cerise. Slightly fragrant. A rapid grower, resistant to cold. Usually blooms here in March.

Lavender

Formosa. Midseason. Very large flowers of lavender-lilac. Hardy, easy to grow.

A Rose Announcement

Having grown and sold Roses at Glen Saint Mary for half a century or so, this season we are not going to sell any! But stop—let's not jump too fast at too many conclusions.

The reason for this action is a general scarcity of propagating wood and the necessity of rebuilding our supply of Rose varieties to the point where we can again offer top-grade bushes in wholesale quantities.

Our hope is that Roses will be back with a bang for our season of 1953-54 and that in the meantime you disappointed customers, old and new, will keep always in mind that Glen Roses are out of circulation only on a temporary leave of absence.

SHRUBS AND HEDGE PLANTS

ABELIA, EDWARD GOUCHER

Similar to *Abelia grandiflora* but bearing lilac-pink instead of white flowers in great profusion throughout the summer.

10

Gal. cans.....\$7 50

ABELIA GRANDIFLORA.

One of our very best evergreen shrubs for foundation plantings, corner groups, single specimens, or ornamental hedges. The small leaves are bright glossy green, turning to a beautiful bronze in winter. Its flowers come in early May and the plant is covered with bloom until late autumn.

Quart cans	\$5 00	\$45 00
Gal. cans.....	11 00	100 00

CLERODENDRUM THOMSONÆ

A twining evergreen plant with long, ovate leaves and small flowers which have a white calyx and brilliant crimson tips.

	10	100
Quart cans	\$5 00	\$45 00
Gal. cans.....	11 00	100 00

CLEYERA JAPONICA

A fine evergreen shrub with rather thick, glossy leaves and creamy white, fragrant flowers. Berries red in early fall. An upright grower, reaching a height of 10 to 12 feet. Will withstand wet or dry situations with equal ease and seems to have few insect or disease enemies. We recommend it highly for trial as far north as Atlanta inland or Wilmington, North Carolina, on the coast.

COTONEASTER FRANCHETII

A beautiful evergreen completely hardy in the South. Leaves small, silvery beneath and green above. Gracefully drooping in habit, it can well be used where a low-spreading plant is indicated. Flowers white, followed by orange-yellow fruit.

	10	100
Gal. cans.....	\$11 00	\$100 00

**CYDONIA
JAPONICA**
(Flowering Quince)

CYDONIA JAPONICA (Flowering Quince)

We do not hesitate to recommend both the red- and the pink-flowering varieties for vivid and profuse spring color. They have been grown at Glen Saint Mary for several years now with good success. Half deciduous in this section, they seldom attain more than 5 feet in height, with about the same spread. Spiny branches; leaves 2 inches long, coarsely toothed. Flowers average 1 inch in diameter and are orange-scarlet or salmon-pink—two distinct types, so far unnamed here. Both mature yellow fruit.

Red and Salmon-Pink.

HIBISCUS

We are offering a vastly increased list of these fine plants, both pot and can-grown. There are colors and types to meet every need and gratify every wish of the most discriminating buyer. Quoting from "Hibiscus in Florida" by R. D. Dickey: "The Chinese Hibiscus has been grown in Florida for many years, but with the introduction of new varieties, particularly those in shades of yellow, its popularity has increased tremendously until it is now one of the most widely planted shrubs in the Southern half of the Peninsula." It is also true that the Hibiscus frontier is being steadily pushed northward to include all of Florida, as well as parts of other southern states.

Grafted:

Anderson's No. 161. (Candlelight). Double. Golden yellow of medium size. Good grower. Each

10-in. can, grafted.....\$2 25

Ann Baldwin. Single. Light claret, gold edges and tips. Each

10-in. can, grafted.....\$2 25

Bride. Single, very large, flat, crepy overlapping type, apple-blossom-pink fading to white. Each

10-in. can, grafted.....\$2 25

Burgundy. Double, extra large, dark wine-red. Each

10-in. can, grafted.....\$2 25

HIBISCUS, continued

Charles James, Jr. Double, orange base, mingled with orange-gold.	Each
10-in. can, grafted	\$2 25
Cooper's Ranch. Single, pinkish gold with grainy effect.	Each
10-in. can, grafted	\$2 25
Double Bride. Double, large, creamy white. Very vigorous.	Each
10-in. can, grafted	\$2 25
Glorious B. Single. Large, brilliant burnt orange with glowing cadmium red throat.	Each
10-in. can, grafted	\$2 25
Hendry's No. 40. Double, Probably best double golden yellow.	Each
10-in. can, grafted	\$2 25
Hendry's No. 111. Double. Light yellow, white base.	Each
10-in can, grafted	\$2 25
Poinsettia. Double. Dark velvety red with twisted petaloids, somewhat resembling a poinsettia.	Each
10-in. can, grafted	\$2 25
Pompon White. Double. Creamy white with pinkish base. Medium sized flower definitely five-parted. Strong grower.	Each
10-in. can, grafted	\$2 25
Superba. Single. Very large golden yellow with large white star in center. Vigorous grower and fine foliage.	Each
10-in. can, grafted	\$2 50

Cutting Grown:

Apricota. Single, large, ruffled apricot with light pink center.	
Dark Eyes. Double, similar in color to Mahogany—purplish brown. Upright grower.	
Euterpe. Single, buff with reddish eye.	
Flamingo. Double, color of flamingo plumage.	
Florida Sunset. Single, red with yellowish edge. Strong grower; profuse bloomer.	
Kona. Double, bright silver-pink.	
La France. Single, light pink.	
Mineatus. Semi-plena, double red.	
Peachblow. Double, light peachy pink.	
Red. Single.	
Red Chinese. Single. Interesting variety, mandarin-red.

HYDRANGEA HORTENSIS

Ornamental deciduous shrubs adapted to shady and half-shady locations. The white varieties bloom true to color; the others may be pink or blue depending upon soil and culture. Pink blooms may usually be turned blue by the use of extra acid in the soil and blue varieties changed to pink by sweetening the soil with lime. Valuable as pot-plants indoors or used outside as flowering shrubs. The different varieties cover a long blooming season.

- Engel's White. An interesting novelty in white. A strong grower.

10

4-in. pots.....\$8 50
- Europa. Early, salmon-pink variety. An excellent bloomer that may be easily made blue.

10

4-in. pots.....\$7 00
- Gertrude Glahn. Beautiful dark rose blooms in immense heads; midseason. A really grand performer. Blues easily.

10

4-in. pots.....\$7 00
- Goliath. Another dark rose variety whose name aptly describes it; midseason. An excellent sort; it may be blued readily.

10

4-in. pots.....\$7 00
- Hamburg. This is a tried and true variety; early. Color is carmine; very striking.

10

4-in. pots.....\$7 00

HYDRANGEAS, MIXED

For those who are not particular about varieties, we offer some good unnamed ones at a nice saving. Order by color or "our selection."

10

4-in. pots.....\$5 00

HIBISCUS

ILEX CORNUTA (Chinese Holly)

A dwarf, compact Oriental variety with exceptionally dark, shiny foliage, usually four spines besides tip. Berries red, large and showy.

ILEX CORNUTA BURFORDII (Chinese Holly)

Foliage is a beautiful dark green and very glossy. The leaves are oblong and usually smooth except for a sharp tip.

LAGERSTROEMIA INDICA, WILLIAM TOOVEY.

This fine watermelon-red differs from the older type principally in its habit of growth, which is much more compact and low-spreading. An excellent variety for hedges and low screens, as well as for specimen use in the landscape plan.

B&B	10
4 to 5 ft.....	\$32 50
5 to 6 ft.....	\$42 50

LANTANA SELLOWIANA (delicatissima)

Beautiful flowering shrubs adapted to Florida. Lilac flowers, freely produced, and dark green foliage. Of trailing habit and a rapid grower. Fine for window-boxes, baskets, and as a ground-cover.

	10	100
Quart cans.....	\$4 50	\$35 00
Gal. cans.....	8 50	75 00

Use more shade and specimen trees in landscaping where sufficient space is available for their uncrowded growth. The "Plant America" programme is not complete without proper emphasis on "shades."

Please read "Conditions of Sale" on page 49 before you order.

LIGUSTRUM IWATA

An intermediate grower with small, slightly mottled foliage. Ideal for low foundation plantings and hedges.

LIGUSTRUM LUCIDUM (Wax-leaf Privet)

Very bushy, with rich dark waxy leaves and panicles of white flowers followed by large bunches of black berries. For foundation plantings, hedges and specimens.

Our Ligustrums are grafted on root-knot resistant Quihoui stocks, except where otherwise noted.

Natural Growth, bushy.

Magnolias again! The popular Saint Mary strain we originated is once more available in small to medium sizes. See page 27.

Please read "Conditions of Sale" on page 49 before you order.

PEACH, FLOWERING, HELEN BORCHERS

Double-flowered variety. The clear pink flowers average over 2 inches across; petals are ruffled and incurved. When cut for use in the home the blooms hold up unusually well. The tree is a vigorous grower, particularly when planted on medium to heavy lands. When these are not available, a mulch of straw or leaves will help.

Bare-Root	10	
2 to 3 ft.	\$15 00

PHOTINIA GLABRA

A very handsome, hardy, evergreen shrub which will grow to a height of approximately 15 feet. The new foliage is wine colored and most attractive. The white flowers are carried in clusters and are followed by round red fruits. Prefers a sunny location in well-drained soil.

PHOTINIA SERRULATA

This variety grows to a much greater height than *Glabra* and is a beautiful sight in summer with its dark green, serrated leaves and large clusters of white flowers. In winter it is covered with scarlet fruit.

HOLLIES

Our Hollies are grafted from the finest selected strains of fruiting trees and should not be compared with seedlings. Choose any one of the types offered below, or better still, order the whole collection and you will never again be satisfied with ordinary Hollies.

Croonenburg. A Greenbrier origination. Upright, rather compact grower with fine dark green foliage of larger than average size and spiny leaves. Berries are a good red and are produced when the trees are still very young.

Dahoon (Cassine). A native evergreen Holly that is very satisfactory in the South. Tree is low and spreading in habit, and the leaves are bright and glossy, without spines. Branches are literally covered with bright red berries. One of the most valuable broad-leaved evergreens.

East Palatka. Foliage light green, of medium size, almost smooth, and resembling Dahoon Holly in appearance. A regular bearer of immense quantities of bright red berries.

Ft. McCoy. Narrow, very spiny leaves on slender branches distinguish this variety. Berries abundant. May be readily trimmed.

Howard. The most popular variety we grow. Foliage very dark and glossy, with some spines; berries red and attractive. Excellent.

Hume No. 1. A vigorous grower, spreading in habit, with large, almost spineless leaves. Bears regularly. The fruit is red and of large size.

Male. Occasionally a Male Holly (staminate) is necessary, and we grow a limited number of them each year. Ask for special quotation on these.

Savannah. An attractively upright and rapid grower, this Holly attains true form sooner than most. Foliage abundant, leathery, bright. Berries good size, of fine color. Leaf petioles and branch tips are purple in new growth.

Prices—All preceding Hollies except Male.

MAGNOLIA GRANDIFLORA

The great Bull Bay is the South's finest native evergreen tree; forest specimens often reach a height of 80 feet. The trees are roughly pyramidal in form with heavy leaves 5 to 8 inches long, glossy dark green above, and covered with soft brown felt beneath. The picture made by one of these magnificent trees in the sunlight is one any home-owner may justly be proud of. The flowers, which are produced over a period of two to three months in summer, are great waxy, creamy white saucers, 7 to 8 inches across, each bloom with a mass of yellow stamens and giving out a delightful fragrance. Its flowers are followed by large pods covered with brilliant red seeds.

Years ago we found that there was a great variation in seedlings, so we selected the most perfect types and grafted from them. In this way we have built up a strain, which we have named Saint Mary, superior to the wild trees and, we believe, to any stock in commerce anywhere. Our trees are uniform in size, shape, foliage and flowers, making them especially desirable for street planting.

Grandiflora Saint Mary.

JUNIPERUS COMMUNIS DEPRESSA PLUMOSA

(Andorra Juniper)

A dwarf variety also known as *J. horizontalis plumosa*. Spring foliage is silvery green, turning to a silvery purple or pinkish shade in the fall. It does not grow as close to the ground as some of the creeping forms, but lifts its branches 15 to 18 inches. Good for foundation plantings, for terraces and for rock-gardens. It thrives best in an open, sunny, well-drained location.

RETINOSPORA OBTUSA CRIPPSI

A dwarf evergreen, rarely reaching more than 3 feet in height. The drooping branchlets are frond-like, with curled foliage of a light golden yellow.

	10	100
Gal. cans (grafted)	\$10 00	\$85 00

RETINOSPORA OBTUSA ERICOIDES

This is a beautiful conifer, dense and compact in growth. Naturally it is an upright grower and may be pruned in very narrow, columnar shape. The foliage is a dark bluish green. Not particular as to soil.

RETINOSPORA ERICOIDES, Barton Strain

Brought to our attention by the late J. O. Barton, who was our packing-house foreman for many years. Of slower and more compact growth habit than ordinary *Ericoides*, the Barton has a softness of texture not approached by its older relative.

Prices for above two varieties:

BAMBUSA MULTIPLEX (*B. argentea*)

BAMBOOS

ARUNDINARIA JAPONICA (*Pseudosasa japonica*)

Hardest Bamboo, quickly growing 15 feet high. Large, handsome foliage. Spreads rapidly.

BAMBUSA MULTIPLEX (*B. argentea*)

Vigorous grower for hedges and screens. Handsome foliage and canes which will grow 25 feet.

BAMBUSA MULTIPLEX, SILVERSTRIPE (*B. argentea striata*)

A similar variety with green canes, striped with yellow near the base. The leaves are also variegated with whitish stripes.

BAMBUSA MULTIPLEX, ALPHONSE KARR (*B. verticillata*)

Upright clump Bamboo, with yellow and green striped canes about 30 feet high.

PHYLLOSTACHYS AUREA (Golden Bamboo)

Rapidly spreading, very hardy Bamboo, with bright yellow canes. Very graceful. Good for fishing poles.

Prices—All above Bamboos	10	100
6 to 12 canes.....	\$7 50	\$70 00
12 to 18 canes.....	9 50	85 00
20 to 30 canes.....	25 50	230 00

LAWN AND OTHER GRASSES

AXONOPUS COMPRESSUS (Carpet Grass)

A valuable lawn grass widely used in locations having plenty of moisture. It resembles St. Augustine Grass and retains its color well in cool weather. Carpet Grass does very well for large estates, if the soil is moist to wet and if larger mowing equipment is available. Responds to fertilization, and mowing at two to three inches is recommended.

Bus.....	\$1 35
10 bus.....	12 00

CORTADERIA ARGENTEA (Pampas Grass)	10	100
Small clumps.....	\$9 00	\$85 00
Medium clumps.....	12 00	110 00
Strong clumps.....	15 00	140 00
Extra strong clumps.....	\$2.50 each and up	

CYNODON DACTYLON (Bermuda Grass)

A favorite for lawn purposes in the Lower South. Spreads rapidly.

Bus.....	\$1 35
10 bus.....	12 00

EREMOCHLOA OPHIUROIDES (Centipede Grass)

Centipede is one of the best lawn and pasture grasses for the South. Spreads by surface runners and is excellent for sunny lawns, both dry and moist soils. Centipede does not thrive under alkaline or excessive lime conditions and should not be fertilized at excessive rates. High fertilization causes heavy mat of grass with roots out of the soil and makes it susceptible to drought and disease. Close mowing at less than two inches is recommended. Will set about 1200 square feet per bushel when set one foot apart each way.

Bus.....	\$1 65
10 bus.....	14 50

OPHIOPOGON JAPONICUS

A low-growing Ophiopogon with very narrow, dark green leaves. Excellent ground-cover and border plant. 10 100

2 to 4-bib clumps	\$1 00	\$9 00
5 to 7-bib clumps	1 20	11 00
8 to 10-bib clumps.....	1 40	13 00

STENOTAPHRUM SECUNDATUM (St. Augustine Grass)

A broad-leaved grass excellent for shady locations. May be grown close to salt water. Sets about 800 square feet per bushel when set 1 foot apart each way.

Bus.....	\$1 65
10 bus.....	14 50

STENOTAPHRUM (St. Augustine Bitter Blue Stem Grass)

Bitter Blue St. Augustine is one of our better lawn grasses, if not the best, for certain locations. Shaded lawns, coastal lawns, or those subject to salt sprays, moist to wet soils, and those too alkaline for Centipede, will support good Bitter Blue. Responds best to mowing at about two inches. Too close cutting of this grass is harmful.

A much-improved type, stronger growing, tougher, and extremely resistant to chinch-bugs. Throughout the year it seems to keep its color better than most southern grasses, will stand more dry weather, and is equally at home in sun or shade. One bushel will plant about 900 square feet of lawn if the grass is set a foot apart each way, or 450 square feet if spaced 1 foot by 6 inches.

Bus.....	\$1 85
10 bus.....	16 00

HOUSE-PLANTS

ACHYRANTHES

Often called "Chicken Gizzard", this bright red foliated semi-hardy plant is much used for edging and bedding purposes in warm to temperate areas. Useful also as a pot-plant indoors.

2-in pots.....	10
	\$1 00

AGLAONEMA COMMUTATUM

(Variegated Chinese Evergreen)

Beautiful indoor plant with long, thick, green foliage usually mottled lighter green.

3-in. pots.....	3 50

Blue Boy

Deep blue-violet. Large, rather flat and prolific. Leaves ovate and flat, with down-curved edges; light dull green above, pale below. Plant fine and handsome. Grand bloomer.

	10
2½-in. pots.....	\$2 50
3-in. pots.....	3 50

Blue Girl. Patd.

Flowers of deep blue-violet, cupped, good size. The leaves are distinctively scalloped, showing lighter veining and pale spot at base. A fine upright grower that may become even more popular than its parent, Blue Boy.

	10
2½-in. pots.....	\$3 50
3-in. pots.....	5 00

Du Pont Blue

Light violet. Extra-large, broad, round petals. Leaves almost round with scalloped edges curled down. Dull, light green leaves above, pale below, hairy. Plant flat to convex in growth. One of the best.

	10
2½-in. pots.....	\$2 50
3-in. pots.....	3 50

General Ike

Flower medium violet, slightly larger than average, cupped; light yellow stamens. Blooms fairly high above leaves. Prolific. Leaf broad-cordate and obtuse, scalloped or round-crenate, troughed and recurved, showing prominent pale spot at base tapering off toward center of leaf. These characteristics are less pronounced with age. Foliage is bright green above and similar to Blue Girl in texture, pale silver below with well-marked veining. Leaf stems widen and curve to base of leaves, presenting an almost trumpet-like appearance. Plant full, spready, vigorous. Our seedling of Blue Girl and Dupont Blue.

	10
2½-in. pots.....	\$3 50
3-in. pots.....	5 00

Guam

Free blooming, medium lavender, borne on long stems. Leaves cordate, bright green, somewhat glossy, slightly serrated. Growth vigorous and spreading.

	10
2½-in. pots.....	\$2 50
3-in. pots.....	3 50

SAINTPAULIA, continued

Norseman

Flower a medium, exquisite blue, large; petals round, on short stems. Leaves blunt-ovate and crinkly, rose to dark rose underside. Plant flat and dark.

	10	
2½-in. pots.....	\$2	50
3-in. pots.....	3	50

Pink Beauty. Patd.

Large pink blooms held high on plant. Petals slightly cupped, with irregular edges; prolific. Leaves light dull green above, pale below. Exceptionally lovely and probably the finest and freest flowering pink to date. Sport of Blue Boy.

	10	
2½-in. pots.....	\$3	50

HEMEROCALLIS (Daylilies)

Modern Daylilies are excellent for Florida gardens. Their brilliant colors, fragrance, extreme hardiness and long blooming period make them prime favorites. They grow in sun or part shade in practically any soil. Plant them in the perennial border or among shrubs or foundation plantings. Don't overlook Hemerocallis.

NOTE: The varieties marked with an asterisk (*) are deciduous.

Bagdad.* Combination of orange, coppery red and brown. Long blooming period.

Bijou.* Clusters of small, reddish orange flowers. Late.

Cinnabar. Yellow sprinkled rosy brown. Midseason.

Cressida.* Reddish orange with fulvous band. Midseason.

E. A. Bowles. Narrow, pointed, wide-apart petals of pale gold, shading to reddish orange. Early.

Hyperion.* Large, fragrant flowers of a pale luminous canary-yellow. Midseason.

J. A. Crawford. Very tall. Handsome, wide-open flowers of a clear shade of light yellow, deepening in the throat. A strong grower with a long blooming period.

Linda.* The fluted golden petals are flecked with cinnamon; sepals creamy yellow. Midseason.

Midas.* Tall stalks bearing flowers of a clear, uniform, glowing orange. Early.

Mikado. Golden yellow flower with mahogany-red eye zone. Midseason.

Mrs. John J. Tigert.* This Brazil-red Daylily is strikingly handsome. Blooms rather early and very often a second time later in the season.

Ophir.* Golden yellow, trumpet shaped. Long season.

Orangeman. Deep orange. Early; second blooming.

Pale Moon.* Tall growing, with flowers of palest lemon, long season.

Parthenope. Evergreen foliage with rich light yellow flowers. Midseason.

Semperflorens. This European Daylily is of year-round value in Florida gardens because of its evergreen foliage and long blooming period. Flower-stalks are widely branched, carrying many trumpet-shaped blooms of deep yellow.

Sir Michael Foster. Large, fluted, clear yellow flowers. Long season.

Vesta. Firm-textured flowers of glistening orange-yellow with a trace of fulvous in the mid-zone. Petals are broad and overlapping. Midseason.

Single bibs of above varieties, 10 for \$2.50

HORTICULTURAL BOOKS AVAILABLE
THROUGH US, POSTPAID**THE AFRICAN VIOLET.** Helen Van Pelt Wilson. \$2.50.

A beautiful book covering every aspect of culture, listing 175 varieties. Profusely illustrated. Highly recommended for Saintpaulia fans everywhere!

AZALEAS, KINDS AND CULTURE. Hume. \$3.75.

A brand-new book packed with up-to-date information invaluable to commercial grower and home gardener alike.

CAMELLIAS, KINDS AND CULTURE. Hume. \$6 50

A worthy companion volume for Doctor Hume's AZALEAS, KINDS AND CULTURE, this newest work is authoritative and beautifully illustrated. It covers all phases of growing these much-admired plants. CAMELLIAS, KINDS AND CULTURE should appeal to Mr. and Mrs. John Q. Gardener, who are in need of precise instructions and adequate explanations at a very reasonable cost.

THE CULTIVATION OF CITRUS FRUITS. Hume. \$6.00.

This book is again available to all who appreciate clear and concise information presented in an interesting manner.

GARDENING IN THE LOWER SOUTH. Hume. \$6.00

A re-issue of one of the most widely read garden guides ever published for warmer latitudes especially.

IN FLORIDA GARDENS. Wilson & Ferguson. \$1.50.

Although not new, this little book presents a thoroughly indexed guide to Florida planting that will be invaluable for both new and experienced gardeners.

THE PECAN AND ITS CULTURE. Hume. \$2.00.

A useful guide for those desiring practical information on Pecan selection, culture and processing methods. Over 100 varieties clearly described.

ROSES OF THE WORLD IN COLOR. McFarland. \$5.00.The dyed-in-the-wool Rose fancier cannot afford to be without it! It's a completely new edition of the Rose picture book that has proved so popular with Rose lovers everywhere. *283 illustrations in color.*

FRUIT AND NUT TREES

There is a place for both tropical and other fruit trees in every southern garden. Those sections adapted to growing citrus fruits can, of course, cater to a tremendous commercial market. For large growers such an orchard represents an important investment and brings large returns. Smaller growers and home gardeners as well will find that even a modest number of fruit and nut trees are well worth while.

ORANGES (Field-grown on C. T. Stock)

Glen Improved Navel, Hamlin, Lue Ging Gong, Parson Brown, Pineapple, Tangerine, Temple, Thompson Navel, Valencia, Washington Navel.

GRAPEFRUIT (Field-grown on C. T. Stock)

Duncan, Foster Pink, Glenred, Marsh Seedless, Thompson Pink.

GLENRED GRAPEFRUIT

An outstanding new seedless variety. The fruit resembles Thompson Pink except that flesh of Glenred is a dark rich pink. A faint blush of this color is noticeable through the rind. In habit of growth and time of maturity, Glenred approximates Marsh Seedless. Fruit is somewhat larger and "commercially" seedless.

SATSUMA ORANGE Owari, Kawano Wase, and Silverhill

The Satsuma Orange in the opinion of many, is the most profitable fruit that can be grown north of the round Orange territory. From Savannah, Georgia, along the Atlantic Seaboard, south to Jacksonville, Florida, and in the extreme southern portions of Louisiana and Mississippi, it is a good money crop. Our trees on Citrus Trifoliata, grown with the greatest of care, will make paying groves, and the easy-peeling fruit of these fine "Kid Glove" Oranges are a welcome addition to the home orchard.

CITRUS FOR SOUTH AND CENTRAL FLORIDA

Our extensive Citrus Nursery near Winter Haven, Polk County, in the heart of Florida's grove belt, specializes in Oranges, Grapefruit, Lemons, Limes and other adapted citrus trees that can be best grown on Sour Orange and Rough Lemon stocks. We suggest you write Glen Saint Mary Nurseries Company, Winter Haven, Florida, for wholesale and dealer arrangements in regard to this class of stock, suitable for Central and South Florida planting, and similar latitudes.

CITRUS IN CANS FOR EASY MOVING

Nothing can take the place of sturdy, well-established citrus trees easily and always movable in containers. Use them indoors or out, North or South, to create that certain atmosphere so much a part of our South.

ORIENT PEAR

A promising hybrid for southern growing. Fruit to 3½-in. diameter with thick skin and rather rough finish. Creamy white flesh of good texture but mild flavor. Fruit ripens here in August, but trees bloom later than Kieffer, which is an advantage in avoiding cold injury. Trees are attractively dark green, vigorous in growth; practically immune to fire blight. Particularly good for canning.

PEARS

Carnes, Hood, Kieffer, Orient and Pineapple.

BALDWIN PEAR

Originated several years ago in Baldwin County, Alabama, this fine Pear is a welcome addition to our list. In size it is comparable to Hood. A midseason bearer of excellent-quality fruit. Much finer grained than Pineapple, Baldwin is juicy and a grand table fruit. Trees are resistant to nematode attack to a remarkable degree. We suggest that you try a few this season; it may be just what you need to complete your Pear collection.

GLEN AIR-DRIED PEAT

We are fortunate in having one of the finest deposits of pure Sedge Peat in this part of the country. Analysis as determined by commercial chemists, Thornton & Co., of Tampa, Florida, is as follows:

Available Phosphoric Acid.....	0.04%
Insoluble Phosphoric Acid.....	0.03%
Total Phosphoric Acid.....	0.07%
Nitrogen.....	1.05%
Equivalent to Ammonia.....	1.28%
pH Value....	4.90 (Neutral is 7)

A report from the U. S. D. A., Bureau of Plant Industry, Washington, D. C., to whom we sent samples of Glen Peat, reads in part: "The material is exceptionally uniform in texture, composition and reaction. It consists of fibrous material derived from rootlets and underground stems of sedges and several grasslike plants. Plant remains from Sawgrass are not abundant however, and organic material from Sphagnum mosses is not present. The reaction is acid pH 4.5 to 5.0."

Moisture retention ratio, 4.26 to 1. This means that Glen Peat will hold, when fully saturated with water, more than four times its own dry weight.

Normal moisture content of air-dried Glen Peat runs from 20 to 30%, and is therefore ideal for plant packing and most other horticultural uses. It may be stored in the open without fear of deterioration. For this reason, Glen Peat can be purchased in car or truck lots for use as needed.

WHAT TO DO WITH IT

Use it for lawns, both old and new—incorporated in the soil when building new lawns, or as top dressing at least once a year on established grass.

Use it to build up humus content of light soils and to improve their moisture-holding capacity.

Use it as a mulch wherever one is indicated, but particularly for acid-loving plants such as AZALEAS, CAMELLIAS, MOUNTAIN LAUREL, GARDENIAS, HOLLY, MAGNOLIA, TEA PLANTS, NANDINA and others.

Use it thoroughly mixed with the soil in planting AZALEAS and CAMELLIAS; its acid reaction will help keep these plants in the best possible condition.

GLEN AIR-DRIED PEAT PRICES

\$3.00 per yd. shredded and delivered in city limits of Jacksonville in truckload lots (15 yds. or better to load).

\$13.00 per ton shredded and sacked in truckload lots, delivered in Jacksonville City limits. Smaller quantities sacked (2000 lbs. minimum) and delivered in City limits will be at the rate of \$15.00 per ton.

Our truck charge on full loads of bulk or sacked Peat will be 40c per road mile, outside of a radius of 55 road miles from the Mine at Florahome. There is no delivery charge for the first 55 road miles, but from there on to destination will be figured at 40c per mile *one way only*.

CONDITIONS OF SALE

PRICES: Prices herein are for the Wholesale Trade only and cancel all previous Lists. They are based on current conditions and, therefore, subject to CHANGE WITHOUT NOTICE.

It is intended that orders placed at prices in this List shall consist of not less than five (5) plants of a class, as five Roses, five Oleanders, five Pecans, etc., regardless of varieties ordered to make up that five.

5 will be furnished at the 10 rate

50 will be furnished at the 100 rate

500 will be furnished at the 1000 rate.

All prices in this List are f. o. b. shipping point.

PACKING CHARGES: No charge will be made for packing small potted and bare-rooted stock or bulk carlot and truckload shipments. Packing will be charged (per schedule on page 50) on tubbed specimens, balled and burlapped plants, and large bare-rooted plants.

TERMS: Cash in full with order, 5% discount, except where otherwise noted. This applies to plant orders only. To those of established credit, 2% within ten days or net thirty days. Cash or satisfactory references are required of those not having established credit with us.

TAGGING AND CHECKING: An extra charge of 10% will be made when customers select their plants in the fields or if we tag nursery stock for our customers for any reason. Increased labor costs make this move necessary.

We trust you BUT all customer-selected plants, as well as regular orders, are liable to careful grade check in the Packing House. If discrepancies are found, they will be corrected and the necessary changes made in the billing.

RESERVE ORDERS: Reserve orders are accepted upon the condition that they shall be void should injury befall the stock before shipment from any cause not under our control. Stock held in our fields on reserve long enough to grow to larger grade will be billed accordingly at shipping time.

On reserve orders for stock to be shipped at intervals or more than thirty days later, we require 25% advance payment. If booked and not reserved by cash payments, we are not responsible for any variety or size being on hand when stock is ordered shipped.

GUARANTEE: We guarantee our stock to be well grown, true to name, properly packed and shipped according to instructions. In no case shall our liability be more than the original invoice value. There shall be no nursery stock sold under a guarantee to live, except with the understanding that, if it dies, it will be replaced *as soon as possible*, at not less than 50% of purchase price. Claims for replacement must be made in writing within thirty days after receipt of plants.

CLAIMS: If by any possibility an error or omission should be made, or some item should be found damaged upon unpacking, notify us within ten days after arrival of goods, or make *immediate* claim for damage to the transportation company if circumstances warrant it.

SHIPPING INSTRUCTIONS: We ask our patrons to furnish complete shipping instructions with each order, as to both destination and mode of shipment. Otherwise, our best judgment will be used.

DELIVERY BY OUR TRUCKS at 12½¢ per mile on a round-trip basis. It is often possible for us to deliver several orders on one load, the truck cost being pro-rated according to weight.

COLLECTION OF EVERGREEN SHRUBS

By means of Balled and Burlapped and potted stock, the planting season may be extended throughout the year.
